

+ "A single-clinician practice spends, on average, \$17,160/year associated with the current method of exchanging patients' health information."

## Merge Honeycomb™

The nation's largest medical image sharing network.

Patients continue to bring their images to the hospital on CDs. Both your in-house specialists and referring physicians are frustrated. Providers are telling you that they will only use your EMR if it includes images. But, at the same time, you need to spend less on imaging infrastructure. If only you could securely and cost-effectively share images over the Internet?

Now you can.

### How We Help You

Merge Honeycomb is our code name for a revolutionary offering that harnesses the power of the cloud so you can upload, download, view and share medical images anywhere, anytime. Improve quality of care and patient safety as you increase referrals, with the nation's largest medical image sharing network.

### With Merge Honeycomb You Can:

- Eliminate the need for patient-borne CDs
- Provide VPN-free exchange of images
- Share diagnostic images securely via the Internet
- Easily view outside studies
- Eliminate waiting for images
- Eliminate image format incompatibility
- Reduce duplicate exams
- Speed time to treatment
- Increase referrals
- Reduce IT complexities associated with sharing exams

**+ Merge iConnect Solution Suite**

**Merge Honeycomb:** Harnesses the power of the cloud to upload, download, view and share images anywhere, anytime with the nation's largest medical image sharing platform.

**Merge iConnect VNA:** Archive all of your enterprise-wide images with a vendor neutral solution that enables providers to manage images and content from disparate PACS into a consolidated patient view.

**Merge iConnect Share:** Share any image between your enterprise and referring centers via an Internet-based gateway, and replace the patient-borne CD.

**Merge iConnect Access:** Provide diagnostic quality image review for referring physicians from any browser-based device with a zero-download image and XDS viewer, and build your referral network.

**Merge iConnect Kiosk:** Collect quality data with a patient check-in device that automates the front office by integrating seamlessly with information systems and EHRs, freeing your staff for other tasks.

**Merge iConnect Exchange:** Exchange unified patient records with multiple healthcare providers using an interoperability platform, and image-enable your health information exchange.

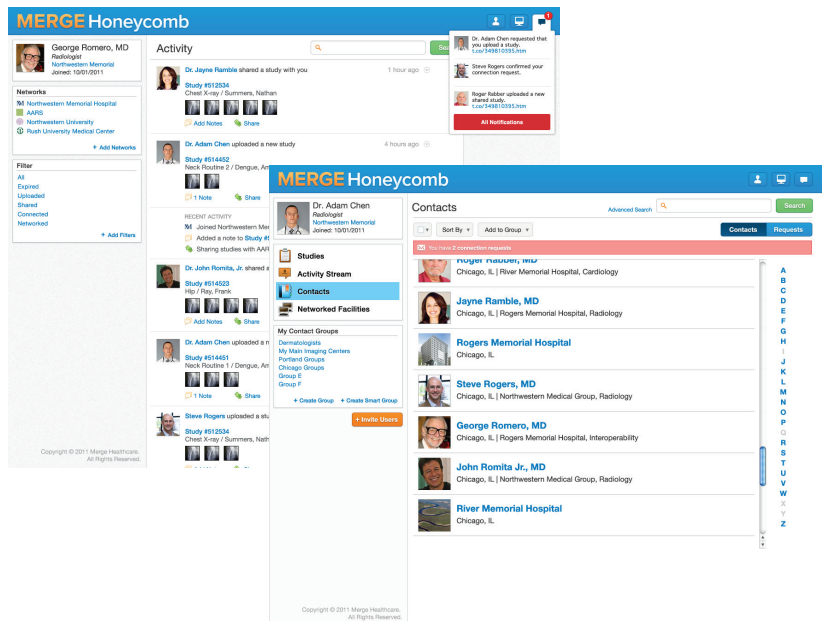

**Merge Interoperability Solutions**

Merge Honeycomb is part of our Merge iConnect solutions set – an integrated suite of software products that delivers complete image interoperability – lowering costs and improving patient care, while also serving as a foundation for a comprehensive enterprise imaging strategy.

Merge iConnect is the only comprehensive solution for collecting, archiving, viewing, sharing and exchanging any type of image, anywhere and anytime. Interoperable image exchange and management is an enabling technology that reduces or eliminates many barriers to efficiency in healthcare organizations. True interoperable image exchange is a key component of an overall strategy to provide secure and timely access to patient information regardless of location and affiliation. This reduction in time and cost is beneficial to healthcare providers, physicians and patients.

Merge iConnect works with existing applications, leveraging widely-used web and healthcare technology standards, to provide a vendor neutral interoperable environment. Healthcare providers and physicians can use and benefit from Merge iConnect's scalability from simple image viewing all the way to enterprise level management and integration of diverse image sources and applications.
