

Merge Hemo[™]

Real-time documentation tool for the cardiac cath lab

Merge Hemo
was ranked
#1 in KLAS
for 2011.

Your cath lab needs to run more efficiently, but your physicians and technologists are hesitant about the transition to digital workflow and reporting. If only there was a solution with a simple user interface geared to cardiac cath labs that could improve workflow, analysis and quality throughout your lab.

Now there is.

How We Help You

Merge Hemo lets you integrate data collection, waveform analysis, inventory control, patient charging and procedure reporting into a single system that makes your cath lab more streamlined, efficient and cost-effective. What's more, the touch-screen interface and user-defined workflow ease the transition for physicians and technologists.

For more than 20 years, Merge Cardiology Solutions have been developed by cardiologists, providing systems, workflow tools and reporting that physicians are familiar with.

With Merge Hemo You Can

Automatically pre-populate physician clinical reports with relevant hemodynamic data to create a complete image and information management system

Visualize your entire cath lab department (including pre and post holding) on a single screen via the Electronic Whiteboard

Simply drag and drop data into the time-stamped log with an intuitive touch-screen user interface

Complete real-time patient monitoring including integrated EtCO2 and FFR measurements

Capture up to 100 percent of the data required by the ACC for the CathPCI registry

Merge Cardiology Solution Suite

- + Merge Hemo™:** Document the hemodynamic workflow and data collection in your cath lab into a digital patient record using a simplified touch screen interface and automated reporting.
- + Merge Cardio™:** Access and manage your patients' digital integrated cardiovascular record from a centralized, web-based system that lets you streamline report generation and distribution.
- + Merge iConnect® VNA:** Archive all of your enterprise-wide images with a vendor neutral solution that enables physicians to manage images and content from disparate PACS into a consolidated patient view.

Merge Cardiology Solutions

Merge Cardiology Solutions provide a single web-based view of a patient's complete cardio record from all modalities and access to simplified reporting tools, so physicians can get information faster, reports are quick and consistent, and procedures are done more efficiently.

For more than 20 years, Merge Cardiology Solutions have been developed through a partnership with cardiologists and clinical staff, providing systems and tools with workflow and reporting that physicians are familiar with and comfortable using. This makes adoption of these systems successful, so hospitals, labs and patients can benefit from the efficiencies and cost savings that come from best-of-breed information and imaging solutions.

The Merge Cardiology Solution seamlessly integrates with the industry's largest health information systems and EHRs for interoperable image exchange, a key component of an overall strategy to provide secure and timely access to patient information regardless of location and affiliation.
