

Merge Eye Care PACS[™]

A web-based image management system

90% of data
in an electronic
record comes
from images.

Your practice has a vast amount of image-intensive data from various diagnostic devices used by a range of specialists. You would like to have a system that integrates all of your patient information into a single view so you can get more patients through the door and improve the quality of care.

Now you can.

How We Help You

Merge Eye Care PACS lets you automatically import all of the images and diagnostic reports from multiple diagnostic devices into a single web-based system and review them anywhere, any time.

Merge Healthcare has a client base of **more than 2,000 sites**, representing over 60% of the top ophthalmic institutions in the United States.

With Merge Eye Care PACS You Can

Have full-image processing functionality in a web-browser environment featuring the full functionality of Automontage and Perfectview

Reduce clicks by defining SmartView, an innovative way of opening multiple test types, arranging them on the screen together, and using Autohistory to review all priors

Leverage industry standards of DICOM and HL7 for maximum portability and compatibility of image records

Connect directly to an EMR in patient context

Interpret test results and communicate them to an EMR via HL7

Merge Eye Care Solution Suite

- + **Merge Eye Station™:**
Convert your existing fundus camera or slit lamp to a fully digital system without replacing your camera
- + **Merge Eye Care PACS™:**
Automatically import all of the images and diagnostic reports from multiple diagnostic devices into a single web-based system and review them anywhere
- + **Merge EHR/PM™ for Eye Care:**
An integrated electronic health record and practice management solution built for the unique needs of ophthalmic practices

Merge Eye Care Solutions

Merge Eye Care Solutions provide a suite of products specifically for ophthalmic imaging and informatics, including a single platform electronic health record (EHR) and practice management system, a digital imaging management system, and a modular imaging device that can capture images of both anterior and posterior segments.

Merge Eye Care Solutions provide an opportunity for practices to meet the growing need for increased patient visits, early detection and accurate tracking of disease progression.

Formerly known as OIS Symphony, Merge Healthcare is proud to welcome Merge Eye Care PACS to the Merge Eye Care Solution Suite.
