

+ Proven, globally deployed ePRO solutions by Web, phone or device for collecting the most important data point in any clinical trial

Merge ePRO™

ePRO by device, web or phone

Merge ePRO offers multiple, adaptable modalities for capturing electronic patient reported outcomes (ePRO) for near real-time analysis. The result is high subject compliance and more reliable data across different therapies, populations and geographies.

Whether by devices, by Web or by phone, Merge ePRO offerings provide best-in-class capabilities that are simple to use for subjects of all ages, from pediatric to geriatric populations; and make collecting patient-compliant data easy.

Goal

Collect data electronically to avoid the problems associated with paper-based collection such as patient compliance, transcription errors and limited data analysis, and be consulted by experts on the best modality for collection.

Advantages

- Improved patient compliance
- Rapid access to primary efficacy data from a patient perspective
- Greater accuracy of data—some treatment effects are known only to the patient
- Decreased data management cost (of data cleaning)
- No more double data entry, illegible handwriting, measuring VAS scales with rulers, and helps eliminate extraneous text or comments
- FDA recognition of the increasing clinical value of ePRO

Benefits

- Full integration with Merge's EDC, IVR/ IWR and Imaging Solutions
- Devices built on the industry-leading Windows® platform
- Predefined study questions accelerate start-up time, and can be customized to meet specific study parameters
- Mid-study changes are deployed easily to achieve critical, clinical endpoints so sponsors stay on budget and on track even when their protocol changes
- Immediate access to source data enables real-time study management for better decision-making
- Multi-language, global studies use a single database that enables faster validation of all data, regardless of language, and accelerates FDA submissions
- Phone lines that scale, including

+ Related Products

- Merge EDC™
- Merge myEDC™
- Merge CIMS™
- Merge EAS™
- Merge IVR/IWR™

- dedicated lines and toll-free numbers, so patients always get through the first time
- Controlled access with review capabilities at the site allows for a more efficient workflow and can be used to score patients for inclusion or exclusion criteria
- Data annotations help enhance data quality by allowing patients to elaborate on their condition and ensure faster discovery of adverse events
- Scheduled or conditional alarms, calls or emails allow better collection workflow providing cleaner, more compliant data
- Multiple, secure connectivity methods offer options that suit patient and sponsor preferences, study budgets and scalability requirements
- Easy device navigation through on-screen graphics or handheld buttons that simplify the data entry process and help patients of all ages stay engaged
- Powerful flow control semantics for conditional questions ensure critical endpoint data get answered
- Extensive help system provides application and study-specific support to users, reducing Help Desk calls and minimizing site workflow disruptions
