

Merge myEDC™

EDC as simple as you, your mouse & a browser

+ Highlights

- Design, update and deploy studies in weeks not months.
- Perform 100% of the study-set up on your own from design to study close-out – perfect for non-technical project teams
- Gain a true cost and time efficient alternative to paper-based studies.
- Access data in real-time.
- Implement protocol amendments instantly.
- Export your study data into multiple formats including SAS and XML

myEDC™ is designed for the customer who wants full control over the design, deployment and management of their clinical trials. myEDC enables study sponsors and contract research organizations to manage directly every aspect of their clinical trial through an intuitive, wizard driven interface. myEDC provides an easy-to-use, cost-effective solution enabling users to get studies up and running in weeks not months.

myEDC is a fully functional and web-based, self service solution that is priced and optimized for those studies that have traditionally used a paper process. myEDC can be used for any trial type from large registry to early phase, academic research and investigator-initiated trials – if you want the control over your studies then you'll want to use Merge myEDC.

Goal

myEDC provides a simplified model for EDC, enabling you to create and administer studies easily on your own without the cost and time associated with full service solutions.

Advantages

- Study design wizard guides you step-by-step through the study design process
- Set-up and re-use your own templates or chooses templates from our built in library
- Design pages, visits and system

queries with ease in a excel-like grid format

- Customize your own page and subject process based on your study preferences
- Use your own icons, images, terms, roles and rules for status changes of pages and subjects.
- Deploy mid-study updates with ease
- Fully validated and 21 CFR Part 11 compliant

Simplicity

Build and manage your own studies using mouse clicks and menus without the need to learn a programming language. Take advantage of the wizard driven interface for new users or the folder-style dashboard as you gain more experience building studies.

Control

With myEDC, you control the workflow, design, management and data for your studies. You can design the study elements to meet your needs and

+ *Offers a new way of thinking about electronic data capture by giving users control over the design and deployment of their studies*

internal processes. From deciding how to format dates to how you want to label study participants, you have the control at your fingertips.

Efficiency

myEDC makes it easier and quicker to design studies. You have the option to use our templates; developed using the published CDISC standards or build your own libraries. You can import from study to study or from the libraries to create new studies in record time.

Flexibility

myEDC study and design attributes enable you to manage the features and formatting of your study. As you are designing pages, you can view and adjust your pages on an ongoing basis. It is easy to design your eCRFs the way you want them to look.
