

Merge OrthoPACS™

An image capture and management solution designed for orthopedics

The rate of osteoporosis and osteopenia for those over age 50 is estimated to increase to more than 61 million by 2020¹.

¹Facts and Statistics. International Osteoporosis Foundation. <https://www.iofbone-health.org/facts-statistics#category-14>

To quickly and easily meet imaging requirements, a flexible and scalable orthopedic-specific PACS, ready to be implemented as a standalone PACS or expand across institutions, is needed. Orthopedic practices and surgeons will benefit from a solution that streamlines workflow and manages clinical needs from patient visits to the operating room and beyond.

Now you can.

How We Help You

Merge OrthoPACS lets orthopedic surgeons access images taken at multiple locations, diagnose from anywhere using any web based device, plan for surgery with digital templating, and securely archive studies. The outcome? Faster results and more efficient care from an integrated orthopedic imaging solution.

Merge OrthoPACS

is an image management and digital templating solution designed for orthopedics.
With Merge OrthoPACS you can...

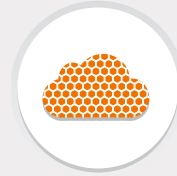

Instantly access
digital images from any
web-based location

Deliver digital results
to referring physicians
and patients faster

Accurately plan for surgery
with digital templating and
orthopedics measurements

Securely archive
and share images in the
cloud for long-term storage
and disaster recovery with
iConnect® Cloud Archive

Merge Orthopedics Solution Suite

Image capture workstation
and detectors.

**Merge OrthoPACS is not FDA cleared for
diagnostic use on mobile devices.*

Merge Orthopedic Solutions

Merge offers a suite of solutions designed to meet the unique needs
of orthopedic practices and surgeons for both patient information and
image management. With Merge Orthopedic Solutions you can:

- Improve the efficiency of clinical and support staff, so that your
practice can see more patients every week
- Manage images and making medical images accessible from
anywhere, any time
- Plan for surgery by coordinating surgical and support staff
pre-operative readiness

Developed by orthopedic specialists, Merge Orthopedic Solutions
mirror your existing charting and patient care workflow, increasing the
long-term adoptability and satisfaction of users.

This EHR Module is 2014 Edition compliant and has been certified by an ONC-ACB in accordance with the applicable certification criteria adopted by the Secretary of the U.S. Department of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments. Drummond Group is accredited by ANSI and approved by ONC for the ONC HIT Certification Program to certify: Complete EHR, EHR Module (all), and Certification of other types of HIT for which the Secretary has adopted certification criteria under Subpart C of 45 CFR.

Merge OrthoPACS v6.6. Holds Certificate No. 12022013-2306-6A. Date Certified: 12/19/2013. Effective Date: 2014 Edition. Modules Tested: Modules Tested: 170.314(a)(12); 170.314(g)(1, 4).

Associated Pricing: Licensing and implementation of the functionality and content covered by this certification will require ongoing and/or one-time license and/or service fees covering the right to use the in-scope solutions, support, and requested standard implementation, integration, and consulting services. Interface implementation will require one-time costs and/or ongoing service fees. An upgrade to Merge OrthoPACS v6.6 is available to all existing Merge OrthoPACS customers with an extended Maintenance Agreement at no additional charge specifically due to this new feature.
