

Merge Presurgical[™]

A preoperative solution to gather patient data and manage patient risk

One large community hospital in the Northeast improved its Case Mix Index by 0.1155 points and **decreased its case cancellations from 3.5% to 1%** with Merge Presurgical.

To improve clinician efficiency and facility revenues you need a complete medical record of patients before surgery to help order appropriate tests, optimize patient health, and start all cases on schedule.

Now you can.

How We Help You

Merge Presurgical streamlines the preoperative process by collecting and verifying the patient's medical history, allowing the perioperative team to triage presurgical preparation and optimize patient care.

Merge Perioperative Solutions **improve documentation in the perioperative environment** by capturing data and producing a complete patient record.

With Merge Presurgical You Can

Enhance quality of care by allowing patients to provide an electronic medical history online

Triage patients coming through presurgical testing based on risk factors

Use Presurgical as a standalone system or integrate with Merge AIMS for a complete electronic patient record

Eliminate unnecessary testing and improve throughput

Reduce case cancellations and delays

Merge Perioperative Solution Suite

- + **Merge Presurgical[™]:** Gather data from patients in advance of surgery, score their surgical risk, optimize their presurgical health, and communicate relevant data with the perioperative team for improved patient safety and clinical efficiency.
- + **Merge AIMS[™]:** Produce a comprehensive electronic patient record with an information management system designed to painlessly capture the critical delivery of anesthesia.

Merge Perioperative Solutions

By compiling the complex data of the entire anesthesia process including presurgical, preop, intraop and postop into one electronic record, Merge Perioperative Solutions simplify processes, enhance patient safety, provide comprehensive documentation and boost revenue for the facility and the clinical staff.

Used in more than 600 operating rooms across the U.S., Merge Perioperative Solutions, formerly DocuSys, have been enhanced by Merge Healthcare and its expertise in healthcare IT and interoperability.
